BLACK
MAGIC

ARE YOU TOUGH ENOUGH

FOR THIS ADVENTURE?

GO YOUR OWN WAY. EVEN WHEN YOU'RE OFF THE BEATEN TRACK.

Optimal hold. And all that in grand style.

Mounted just the once, and never moves – with the right bracket. The scope of delivery for **HELLA Black Magic Light Bars** for offroad use includes side brackets for screw mounting. For light bars longer than 40 inches, HELLA recommends the secure four-point mounting system with additional brackets.

The accessory sets for "Slim Row" and for "Double Row" each consist of two brackets and two sets of screws – and can be quickly mounted. Simply insert them into the headlamp's guide rail, and tighten the screws securely! Switch on and then it's a case of hello light, goodbye boring routine!

360° BLACK

BLACK BEAUTY.
MAKES THE DARK BEAUTIFUL.

Everything appears in the right light, thanks to a sophisticated reflector design and a power LED.

Beauty that comes from within and radiates outwards: the **HELLA Black Magic Light Bars** are available in 18 different variants for off-road use. With up to 80 LEDs, an effective light output of up to 20,000 lumens is easily achieved. This leaves absolutely nothing in the dark – and the adventure can begin.

The light bars are available in many different lengths as "Slim" and as a "Double Row" – and for the first time both types are now also available as curved variants. All models are equipped with a temperature control system: it adjusts the light bars to the ambient temperature, protecting against overheating and also regulating the light output in cold ambient temperatures – ideal for off-road use, no matter on which continent you happen to be driving.

Absolute freedom that you can feel – and see.
Off the road!

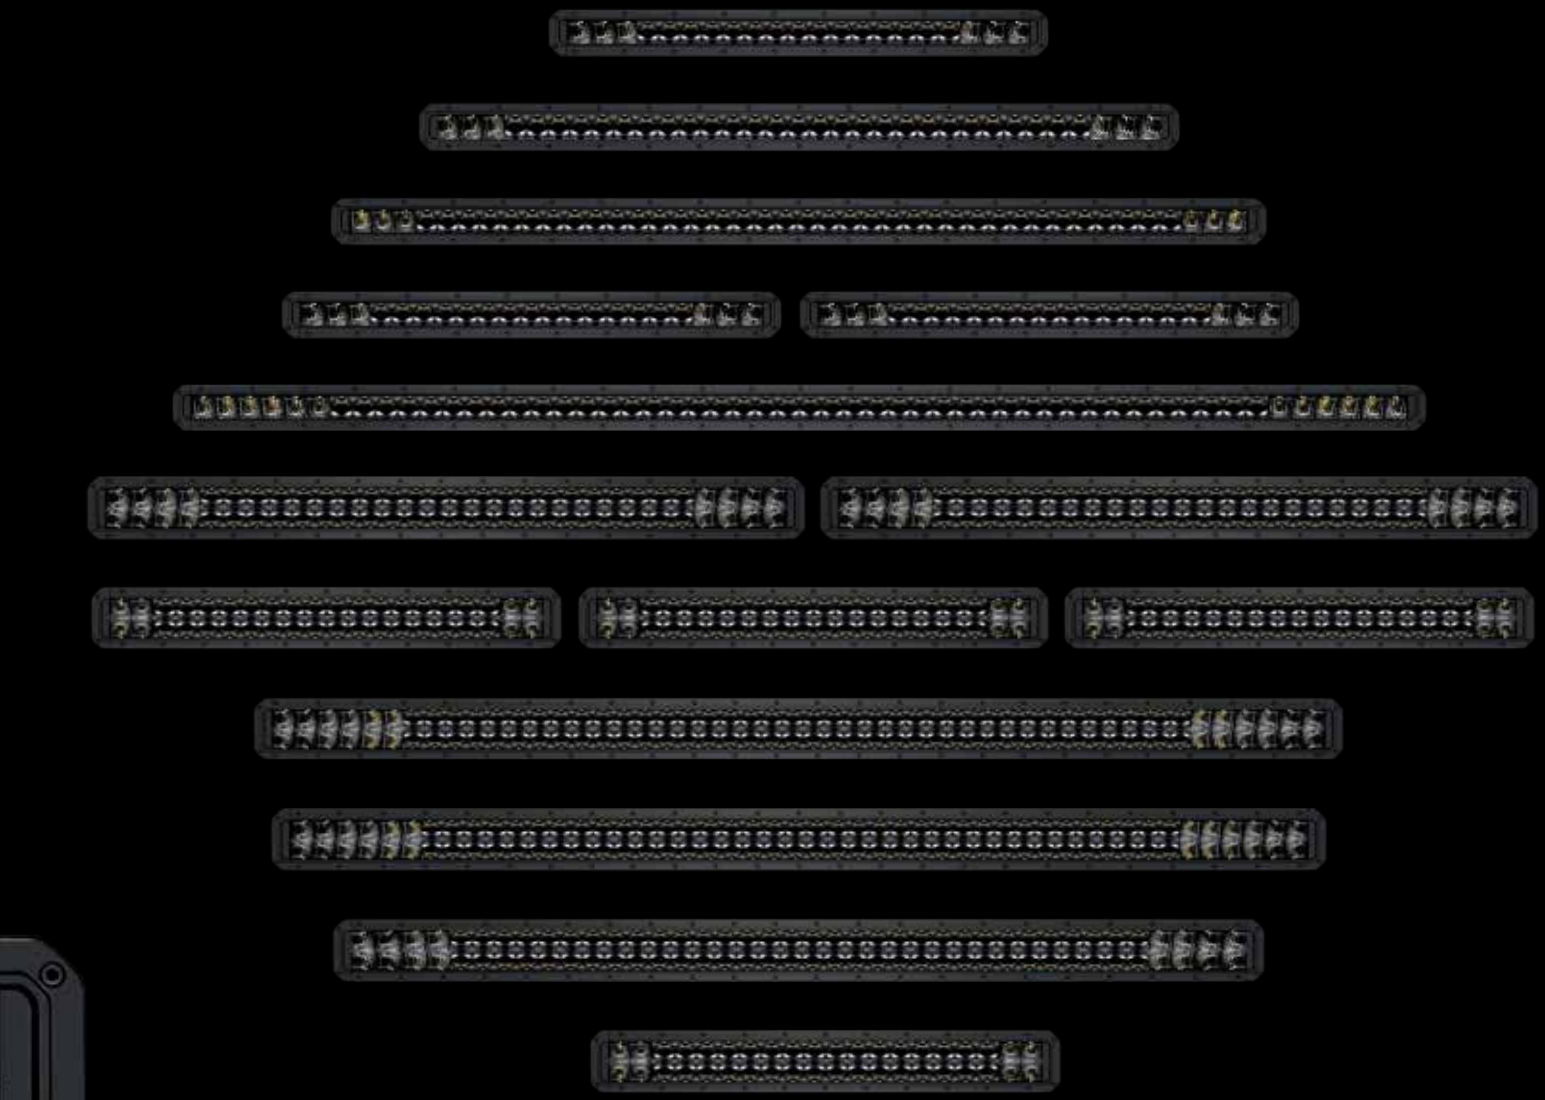

No rules, no regulations: fix whatever you like on your vehicle! On the roof, on the roof bar, on the radiator grille or on the bumper, in pairs or singly – you decide what your vehicle needs for its next mission. You can be completely flexible in the choice of your light bars and their combination. And by the way: you'll be giving your pick-up or off-roader a really cool look: the all-black, heavy-duty design bestows upon your vehicle a unique character down to the very last detail – making it extravagant, robust and unconventional.

TOUGH ON EVERY KIND OF ROAD, AND EVEN WHEN YOU'RE OFF THE BEATEN TRACK.

Heavy-duty design for the toughest demands. Deals with absolutely everything.

Bring on the dirt and grime, the **HELLA Black Magic Light Bars** are up for anything and everything. They boast the highest dust and water resistance class, they are totally robust and have a particularly long lifetime. And thanks to their fastening brackets, nothing will knock them out of place in a hurry. Ideal for use off the beaten track.

TOUGH.
TOUUUUUUGH.
TOUUUUUUUUUUUUGH.

Whether you use just one or several, Black Magic is the right choice for every situation.

The 18 different light bars for off-road use are available starting from a length of 20 inches. The choice is wide, the uses so diverse: because they can be combined with one another in any way – even with the ECE-approved variants.

So you only have limited space left on your pick-up or off-road vehicle? Not a problem! Just choose our 7-inch and 13-inch variants from the Road range.

Whichever way you look at it, you'll see a wonderful black. And that's beautiful!

Power you can rely on. The light bars with the discreet HELLA branding are mounted upright or pendant – and are completely flexible. The mounting angles are freely adjustable and thus adaptable to any situation. The unmistakable black design down to the last screw combines good looks and excellent operation. So the only question that remains is this: **are you tough enough for the wild?**

EXTREMELY TOUGH. AND YET TOTALLY FLEXIBLE.

360° BLACK

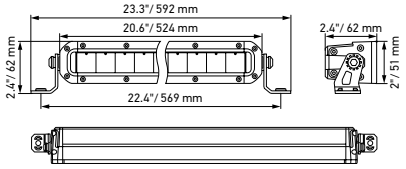

PERFECT CURVES.
RADIANT APPEARANCE.

**Really sturdy. And really elegant.
All at the same time.**

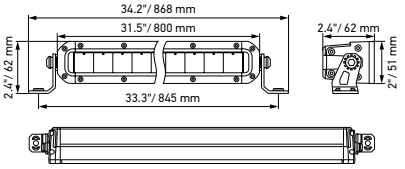

Every vehicle starts to glisten. Brand new in the HELLA range: our "curved" variants. They enable an even wider light diffusion without any stability being lost. And they look pretty cool, too. With their unique appearance, they give every vehicle the ultimate look – of extravagance and class at the same time.

IN TOP SHAPE. IN 18 VARIATIONS.

LIGHTS ON.
GO GRAVEL TRACK. GO FOREST. GO MOUNTAIN. GO LAKE. GO FIELD PATH. GO GRASSLAND. GO ADVENTURE.

Crash through barriers, because anything is possible. No matter what the surface, no matter what kind of dirt track, with the 18 different light bars for off-road driving, you can equip your vehicle for any kind of demand. And at the same time you are spoilt for choice because the possible combinations are almost unlimited. The off-road light bars can also be combined with the ECE variants: choose the light bars you need – and every path will light up.

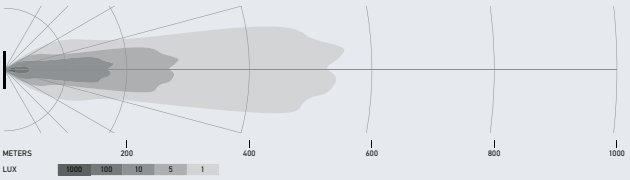

The right light for every road or path.
Even when there is no road or path there!
